Department of CSE
CSE 465 Web Programming
Home Assignment-1

Full Marks: 10

Your submission script/filename must contain your name and ID.

If any portion of answer is found to be copied from other scripts, both will be marked as zero regardless of other answers.

Write the HTML and CSS code to generate the view given on the next page.

- Use CDN icons or crop from the image.
- The generated site should be as similar to the given site as much as possible (In terms of font name/size/color/spacing)

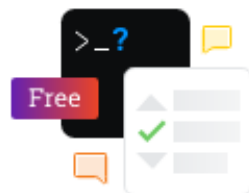

Mark Distribution:

Criteria	Mark
Top Bar	1
Main Body	3
Sidebar	6
Total	10

How to use Flexbox?

[Ask Question](#)

Asked 4 years, 5 months ago Active 3 years, 5 months ago Viewed 777 times

▲ I have a layout like this:

3

```
<div class="outer">
  <div class="inner"></div>
  <div class="inner"></div>
  <div class="inner">
    <div class="deeper">
      <div class="newLineContent"></div>
      <div class="newLineContent"></div>
      <div class="newLineContent"></div>
    </div>
  </div>
</div>
```

I have to align the `div` s like: All the `div` s with "outer" class has to start from new line and all the `div` s with "inner" class has to be in the same line within "outer" `div` and the `div` s with deeper class inside "outer" `div` should start from new line and the "newLineContent" `div` s has to be in the same line within "deeper" `div` s

How can I achieve this using flexbox? or is there any other way to achieve it?
